**BARRIER FREE SURFACE WALL MOUNT PULL DOWN EYEWASH WITH  
BACKING PLATE  
INSTALLATION INSTRUCTIONS**

**PARTS LIST:**

- 1 – Backing Plate (Item #1)
- 1 – Pull Down Activation Eyewash (Item #2)
- 1 – Mounting Adapter (Item #3)
- 1 – Pipe Nut and Washer (Item #4)

1. Determine mounting location for Barrier Free Surface Wall Mount Pull Down Eyewash with Backing Plate.
2. The Americans with Disabilities Act (for drinking fountains) requires the eyewash heads, when in the activated position, to be 36" from the standing level. Measure 36" from the standing level and mark that position on the wall.
3. The B.F. Surface Wall Mount Pull Down Eyewash has a 1/2" MNPT threaded pipe nipple to attach to the supply line. Drill a 7/8" diameter hole in the wall to accept the 1/2" pipe nipple at the marked location. Also, at this time, drill a 1/8" diameter hole in the wall for the anti-vandal pin located on the eyewash valve. See mounting diagram on page 2 for hole locations.
4. Position the backing plate (item #1) on the wall so that the eyewash mounting holes on the backing plate and the wall are in line with each other. Attach the backing plate to the wall with the appropriate screws (supplied by customer).
5. Secure the eyewash unit to the wall by passing the pipe nipple and roll pin through the backing plate and wall and secure it to the wall with the pipe washer and nut. If necessary, use the mounting adapter to securely attach the unit to the wall. See diagram on page 2.
6. Support the supply line before attaching it to the eyewash unit.
7. Attach the supply line and test with normal testing procedures.
